

HOT GUN CURING SYSTEM

These HOT GUNS are distinguished by their extremely small dimensions as well as their long service life. Designed for professional uses, the HOT GUN enable any specific application for curing.

They are particularly appreciated for composite curing when heater mat or infrared lamps are not easy to use. That is for uneven shapes and areas hard to reach.

It is useful for composite repair as secondary bonding or modifications to composite structure.

A special protecting device is provided in the event there is no incoming air and protects the hot gun against overheat.

IDEAL FOR

- ✓ Difficult shapes and access

COMPETITIVE ADVANTAGES

- ✓ Highly portable
- ✓ Uniform heat distribution
- ✓ Long life cycle

MAIN FEATURES

- ✓ Power : 1000W to 3000W
- ✓ 3m long inlet air hose and its control valve
- ✓ Filter supplied

OPTIONS

- ✓ Foldable oven
- ✓ Training
