

## VACUUM HOSE

## ACCESSORIES

### VACUUM HOSE

The vacuum hose is a product that is often found in the composite industry. This pipe is directly connected to either the Hot Bonder or Oven.

The hose is shipped with:

- 1 flexible with male adapters ¼ from each side
- 1 female QRC connector ¼
- 1 elbow 1/4"

Vacuum hoses equipped with an external spring are more resistant: the spring slows the wear process and thus gives a longer life cycle to the hose.

#### IDEAL FOR

- ✓ Oven
- ✓ Hot bonder

#### MAIN FEATURES

- ✓ High temperature
- ✓ Max pressure : 7 - 10bar
- ✓ Flexible

### VACUUM HOSES

	Reference	Dimension	Temperature	Pressure	Type
	A5VH25 25=length	1m to 25m	200°C	0 to -1 Bar	Silicone hose
