

INFRARED LAMP

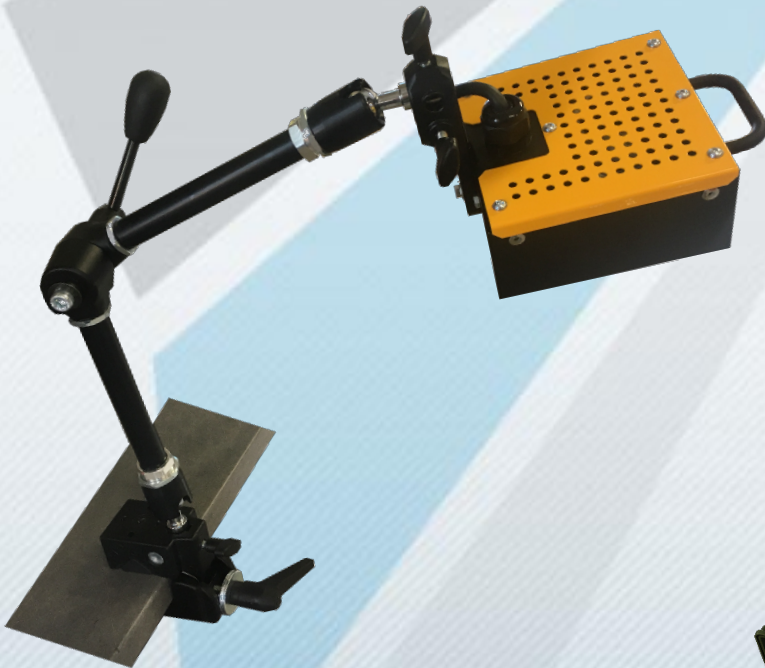

IRXB01 Range

INFRARED LAMP WITHOUT CONTROL SYSTEM

The use of infrared lamp is essential for the composite repair with irregular shapes. Indeed, these lamps can polymerize the composite without any contact.

Our Infrared lamps are very easy to use. Thanks to its clamp and articulated arm, the lamp can be positioned very precisely, in many positions without cluttering the space on the ground.

These infrared lamps execute cycles of heat very precise via our hot bonders.

OPTIONS

- ✓ Mounting system with suction cups (vacuum draw)
- ✓ Composite repair training

IDEAL FOR

- ✓ Curing and drying of small surface in specific environment

ADVANTAGES

- ✓ The lamp can be fixed to any support thanks to its clamp
- ✓ Flexibility for curing
- ✓ Easy to use
- ✓ Very space-efficient

MAIN FEATURES

- ✓ Temperature: Up to 200°C
- ✓ Weight: 2 kg
- ✓ Fonction in all position
- ✓ Lamp support

ACCESSORIES

- ✓ Articulated arm of 53 cm
- ✓ Fixing clamp
