

CONTROL SYSTEM AUTOCLAVE

AFACS

Aeroform has developed an evolutionary control system adapted to autoclaves.

AFACS : Aeroform France Autoclave Control System

AFACSe is a Eycon 15 home machine interface associated with an Eurotherm PLC. This control system has been specially designed for the Aeronautical industry to save up to 8 parts simultaneously.

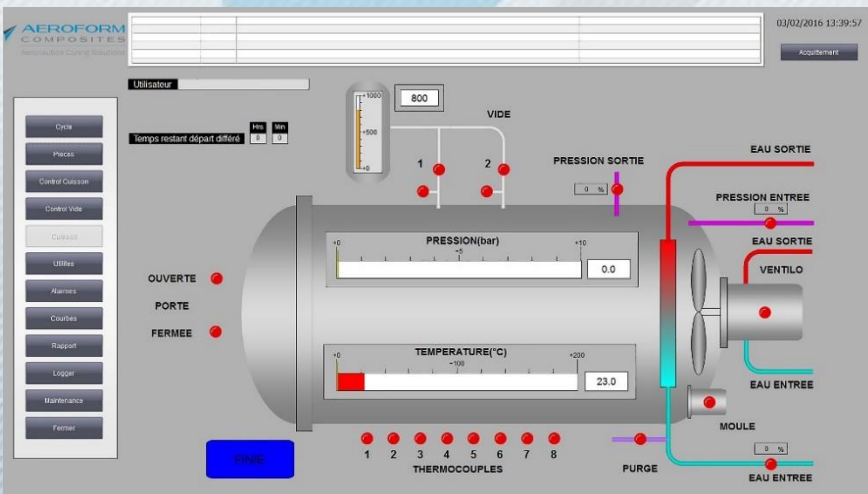

General view

AFACS II is a supervision developed on the WINCC software (SIEMENS) associated with a Eurotherm PLC. It is the most suitable system for production autoclaves.

This supervision is implemented on all types of autoclaves, without limit of number of parts, allowing to have personalized reports.

Quality and maintenance modules are integrated.

Our systems make it possible to meet NADCAP requirements
