

HOT AIR BOX

Drying Solution

Aeroform has developed highly innovative hot air heating solutions to speed up the process of resin and sealant drying at your production sites.

The advantages of this system are to reduce the polymerisation time by 10, guaranteeing significant cost savings for the operator.

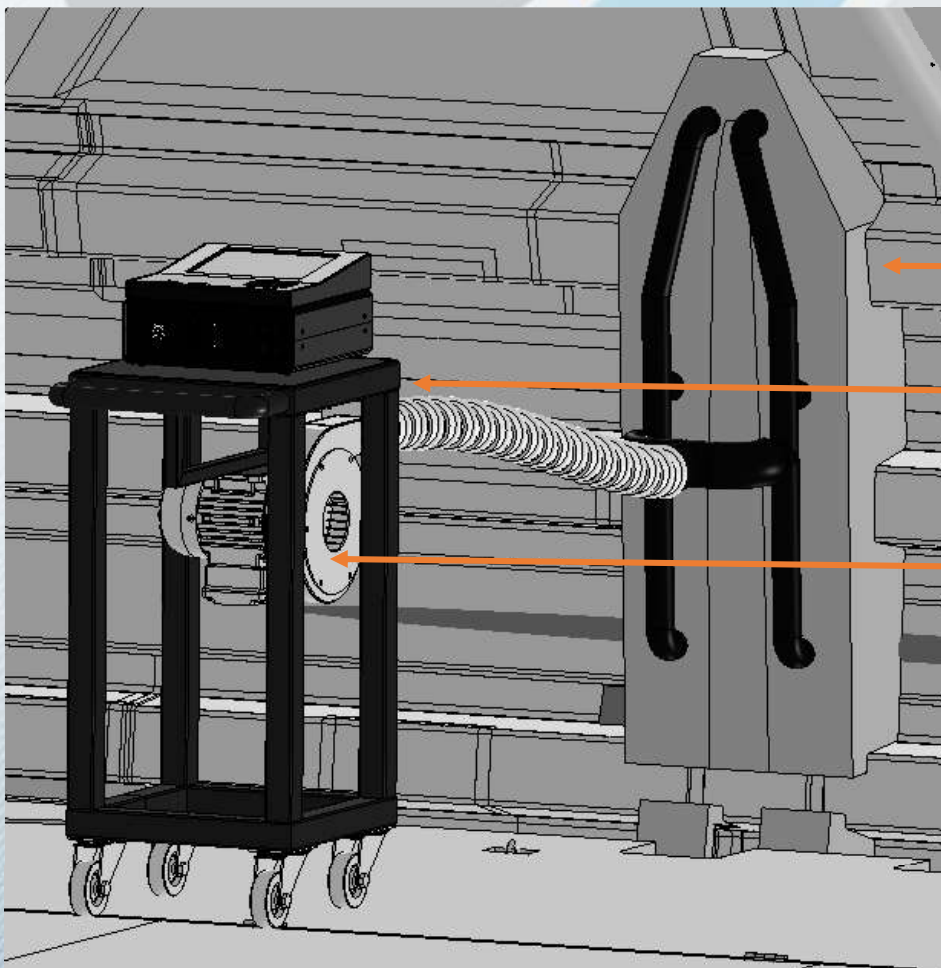

After analysing your specifications, we will be able to provide you with a complete solution including the control unit, a heating device and the heating box.

IDEAL FOR

- ✓ Rapid drying of resin, sealant
- ✓ during repair and process of
- ✓ structural parts

ADVANTAGES

- ✓ Time saving
- ✓ Financial gain
