

ULTRASONIC DETECTOR

A6ULD

ULTRASONIC LEAK DETECTOR

Our ultrasonic leak detector has been specially designed to pick up high frequency sounds caused by gas or liquid escaping through a crack or a hole.

The presence of ultrasound is visualized on the leak detector display. It is translated into a sound signal in the headset. The sounds intensity rises simultaneously, and the light beam of the LEDs increases getting closer to the ultrasonic source.

Practical and robust case

IDEAL FOR

- ✓ Leak test during the vacuum packing of composites

FEATURES

- ✓ Visual indicator: LED display
- ✓ Audible indicator: VCO 0 - 5kHz
- ✓ Sensitivity: Adjustable 50 dB
- ✓ Min. detectable pressure: 1 nbar in the range 25-45kHz
- ✓ Case: molded ABS
- ✓ Temperature range: 0 ° to +55 ° C
- ✓ Battery: 9 V IEC type LF22
- ✓ Dimensions: 215 x 50 x 40 mm
- ✓ Weight: 260g
