

## Vacuum Leak Indicator

This Vacuum leak indicator is used during the vacuum process of composites parts.

It is connected directly between your vacuum plug and your hose.

A visual indicator will reveal the presence of a leak in your vacuum bag. If it does not remain at level 0, it will mean that your bag is not sealed.

### IDEAL FOR

- ✓ Vacuum leaks detection

### ADVANTAGES

- ✓ Very quick to set up
- ✓ Indicator easy to analyze
- ✓ Reliability
- ✓ Security

### OPTIONS

- ✓ Adjustable elbows
- ✓ Quick coupling connectors (QRC) in stainless steel
