

## VACUUM LEAK DETECTOR

A5INFV01

### VACUUM LEAK DETECTOR

This Vacuum leak detector is used during the vacuum process of composites parts.

It is connected directly between your vacuum plug and your hose.

A visual detector will reveal the presence of a leak in your vacuum bag. If it does not remain at level 0, it will mean that your bag is not sealed.

#### IDEAL FOR

- ✓ Vacuum leak detection

#### ADVANTAGES

- ✓ Very quick to set up
- ✓ Indicator easy to analyze
- ✓ Reliability
- ✓ Security
- ✓ Adjustable elbow

#### OPTIONS

- ✓ Permanent elbow
- ✓ Quick coupling connectors (QRC) in stainless steel

ADJUSTABLE ELBOW
